

Melodia

Compact and functional, Melodia is the new coffee machine for Gime's FAP capsules. Designed and manufactured to lower power consumptions, preparing coffee straight in a cup is a breeze, no need a grinder doser.

Professional coffee machine that uses pods, with an elegant and refined design, small in size but great in versatility. Thanks to its practical water compartment located within the machine itself and to its double boiler (one for coffee, the other for steam), Melodia can respond to all the needs of your venue.
